ADMINISTRATIVE POLICY NO. 5 SCHOOL YEAR 2002-2003

SUBJECT: On-Site Review

National School Lunch Program and Afterschool Snack Program

DATE: October 21, 2002

1. On-Site Review – National School Lunch Program

National School Lunch Program regulations 7 CFR 210.8 (a) (1) require that the School Food Authority (SFA) with more than one building conduct an on-site review in each building *annually* before February 1st. A minimum of one on-site review per building is required; the district or SFA may conduct more reviews if needed. The school district determines the method chosen for the review and the staff who will conduct the review. Food Service Management Company (FSMC) personnel **may not** complete the annual on-site reviews. Only authorized employees of the SFA may perform this function.

Critical areas and general areas of the National School Lunch Program must be reviewed at each building. The critical areas include:

Approval of Applications and Counting and Claiming Meals – The SFA must review all free, reduced and denied applications to assure that they have been accurately approved and that students are receiving the correct benefits to which they are entitled. Refer to the "Eligibility Guidance for School Meals Manual." This manual is available at the following website: http://www.fns.usda.gov/cnd/Guidance/default.htm

The monthly claim for reimbursement must be supported by a legal counting system that provides an accurate count of free, reduced price and paid meals in each building. Many excellent counting systems are used in buildings throughout the state. They include rosters, tickets, check lists, and electronic point of service. Systems that are not allowable include tray counts, class room counts and "back out" counts (i.e., dividing the cash box total by the lunch price to arrive at the paid count and subtracting that from the daily total of meals served to get the free count). Only an actual count of the meals served at the point of service is acceptable. If electronic counting systems are used, it is essential to have a back up system in case of power failure or computer hardware/software problems. The on-site review is a good opportunity to review this back up system with staff. Refer to the Meal Counting and Claiming Manual, U.S. Department of Agriculture, Food and Nutrition Service – FNS #270 – April, 1991.

Meal Patterns – The menus and meals served must be checked at each site for availability of all meal components, offer vs. serve, required portion sizes and overt identification. Refer to "A Menu Planner for Healthy School Meals," (U.S. Department of Agriculture, Food and Nutrition Service – FNS #303 – 1998) at the following website: http://www.nal.usda.gov:8001/Recipes/menuplan/menuplan.html Administrative Policy No. 5

STATE BOARD OF EDUCATION

If problems are discovered in the eligibility determinations, counting and claiming procedures or with the meal pattern, a corrective action plan must be developed and implemented for the building by the SFA. In any buildings with a corrective action plan, a follow-up review must be conducted within 45 calendar days of the initial review. This follow-up review must be and documented by the SFA and identify that the problem(s) has been corrected.

During Coordinated Review Effort (CRE) reviews conducted by our staff, application, counting and claiming, and meal pattern problems, can result in a loss of reimbursement for the district. Conducting annual on-site reviews can help prevent problems as well as provide an opportunity for staff training and process review.

2. On-Site Review – Afterschool Snack Program

Each Afterschool Snack Program must be reviewed by the SFA two times per year under 7 CFR 210.9(c)(7). The first review must be completed by the SFA during the first four weeks that the snack program is in operation. The second review must be conducted during the second half of the school year. The review must assess area eligibility determination, counting and claiming procedures, snack meal patterns, menus and production records at each Afterschool Snack Program site. The attached On-Site Review/Afterschool Snack Program form can be used for the required reviews. Information on the Afterschool Snack Program is available at the following website:

http://www.fns.usda.gov/cnd/Afterschool/default.htm

The attached prototype On-Site Review forms for both the National School Lunch Program and the Afterschool Snack Program identify areas of review (critical areas and general areas) to ensure you are meeting National School Lunch and Afterschool Snack Program regulations. These are prototypes and may be replaced by review forms of your creation as long as the required areas are covered for each program. Follow up on corrective action plans must be documented and signed (see last page of the prototype forms).

Do not mail completed on-site review forms to the State Agency. Keep them on file to be reviewed during the Coordinated Review Effort (CRE). Federal regulations require that all records be retained for three years plus the current year. If a federal audit is being conducted, records must be kept until the audit is completed. These On-Site Review forms must be maintained as part of this record keeping requirement.

Please contact a School Meals Program Analyst at 517.373.3347 if you have questions about the on-site review requirements or the prototype forms.
